PROFESSIONAL SUMMARY

My career started in graphic design, where I built a strong foundation in visual communication and layout. I later moved into software development, working with front-end technologies and web applications, before transitioning into UX/UI design. This combination allows me to design interfaces with an understanding of both user experience and how products are actually built.

CORE SKILLS

UX/UI Design : Figma, User Flows, Wireframing, Prototyping, Information Architecture, Design Systems, Responsive Design, Usability Testing

Front-end : HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, Git, API Integration

Collaboration : Requirement Analysis, Developer Handoff, Stakeholder Collaboration, Design Documentation

WORK EXPERIENCE

UX/UI Designer (Contract) – Kachen Digital

Apr 2026 – Aug 2026

- Designed UX/UI for enterprise systems, data-heavy platforms, and responsive corporate websites.
- Translated requirements into user flows, wireframes, interface states, high-fidelity UI, and development-ready specifications; collaborated with developers and stakeholders and supported responsive implementation using Next.js and Tailwind CSS.

UX/UI Designer (Contract) – SSC Integration Company Limited

Oct 2025 – Dec 2025

- Designed user flows, high-fidelity wireframes, interface states, and responsive interfaces for enterprise applications.
- Created development-ready mockups and specifications aligned with design systems, refining designs through stakeholder feedback and usability reviews.

Full-Stack Developer – Code Play Co., Ltd.

Nov 2024 – Sep 2025

- Built responsive web interfaces using Next.js and Tailwind CSS with API integration, working across interface logic and system states.
- Collaborated with designers and backend developers and built admin/CMS tools while supporting backend tasks using PHP and Node.js.

Full-Stack Developer – WinWin Interactive Co., Ltd.

Jun 2024 – Oct 2024

- Built hands-on experience across frontend, APIs, databases, CRM, and web information systems while transitioning from graphic design into software development.

Graphic Designer – Kela Sport

Jul 2021 – May 2024

- Designed social media content, marketing materials, print media, and product visuals while maintaining consistent brand communication.
 - Created layouts and edited product photography using Adobe Illustrator and Photoshop, building a strong foundation in visual communication, typography, and composition.
-

EDUCATION

Bachelor of Multimedia Technology

Rajamangala University of Technology Tawan-ok
