PERSONAL STATEMENT

I merge creativity with technical expertise as a full stack developer, with a strong focus on frontend development. Leveraging my background in multimedia and graphic design, I specialize in crafting interactive, responsive, and user-centric web experiences. I have hands-on experience working on CRM systems and web information platforms, utilizing modern frameworks and technologies. I'm also capable of handling backend development, ensuring full-cycle delivery from UI to server-side logic. Eager to contribute to innovative digital solutions, I continuously seek to grow and stay updated with emerging technologies.

SKILLS

Frontend: JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap, MUI

Backend: Node.js, PHP

Database: SQL, MongoDB, PostgreSQL

Tools: Git, Postman, Figma

WORK EXPERIENCE

Full Stack Developer

Code Play Co., Ltd. Nov 2024 – Present

- Focused primarily on frontend development for CRM systems and web-based information platforms.
- Built responsive and interactive interfaces using Next.js and modern CSS frameworks (Tailwind).
- Collaborated with designers and backend developers to implement UI/UX designs with API integration.
- Maintained and occasionally developed backend logic using PHP and Node.js.
- Contributed to the development of tools for data management and administrative interfaces.

Intern – Full Stack Developer

WinWin Interactive Co., Ltd. June 2024 – August 2024

- Developed a tool to toggle API data on/off, enhancing control and flexibility.
- Designed APIs and databases based on team leader requirements.
- Built frontend and backend systems aligned with performance and user experience goals.
